C++, Java, iOS development (Storyboard, SwiftUI), AWS

Projects

Planning
See it live | App Store | Play Store
> Developed and maintained a hybrid Vue/Cordova app that allows religious leaders and musicians to plan events, schedule rehearsals, communicate with their organization, and share and listen to music.

Music Stand
App Store | Play Store
> Developed and maintained new and existing features on an Angular/Cordova app that allows musicians to view, annotate, and edit chord sheets and sheet music on their mobile devices.

StumpAround
Expo | API Repository | Client Repository
> Developed client, backend API, database management for a React Native social media app providing outdoor PNW information to hikers and explorers. Used React Native, expo, Node.js, express.js, mongoDB, bcrypt.

Experience

Blue Circle Lab / Christian Copyright Licensing International   2020-current
Frontend Developer II
> Developing and maintaining hybrid apps across a variety of platforms and frameworks, responding to user feedback with active updates and seeing active user base growth

Trilogy Education   2020
Substitute Instructor, Learning Assistant, and Substitute Teaching Assistant
> Engaged with full stack and data science bootcamp students online and in person to provide support for specific technical topics and challenges, with an emphasis on JavaScript-based web development and Python-based data visualization

Noah Sylwester - Eugene, OR   2017-2019
Freelance Musician and Music Teacher
> Performed freelance classical oboe for Eugene churches and music organizations across Oregon, led students aged 12-18 through general and oboe-specific lessons to improve musical and cognitive skills.

Education
